

iConnect

For anything remotely connected to your car wash

A variety of functions and reports are accessible directly from the AMTT-CS or from any remote location through Ryko's exclusive iConnect system. Operators can do car wash menu programming from anywhere at any time via a computer and internet connection, easily changing wash packages and pricing with the touch of a finger. Access to a variety of helpful reports from the touch screen or via Ryko's iConnect system is available including Credit Card Transaction, Shift, Manager, Income Cycle and Lifetime reports! Keep current on all your site activities from anywhere at any time with Ryko's iConnect Remote Access System!

KEEPING YOU IN TOUCH WITH YOUR BUSINESS.

AMTT-CS

AMTT-CS

The AMTT-CS allows customers to pay for their wash in a variety of ways. An animated cartoon character walks customers through the process of choosing, paying, upgrading and even getting a code for use at other services at the site. The easy to follow visual instructions on the brightly lit touch screen along with the studio recorded digital audio messaging make paying for and upgrading a wash quick and easy.

With the AMTT-CS car wash activation system, Ryko Manufacturing gives you the perfect opportunity to promote all of your car wash

services to your customers!

The AMTT-CS will play custom video presentations while customers wait to enter the wash. Owners may use the presentations to advertise and promote other services at the site or to advise customers on the advantages and proper use of the equipment in order to receive the optimum car wash results.

THE AMTT-CS CAN

- Codes
- Coins
- Cash
- \$1, \$5, \$10 and more
- Golden dollars
- Credit cards
- Smart cards

THE NEXT STEP IN AUTOMATIC CAR WASH ACTIVATION!

The AMTT-CS operates as a stand-alone unit or in conjunction with Ryko's Code-A-Wash. The unit mounts either on a stainless steel, free-standing pedestal or in a high security brick enclosure.

A built-in vehicle detection system activates the colorful touch screen whenever a vehicle approaches within range of the AMTT-CS.

The AMTT CS also has an optional intercom speaker for remote communications between the operator and a customer at the coin box.
